

f is not continuous
on $[a, b]$ so EVT
doesn't apply

EVT applies!

* Relative (Local) Extrema:

1. If there is an open interval containing c on which $f(c)$ is a MAX, then $f(c)$ is a relative max.
2. If there is an open interval containing c on which $f(c)$ is a MIN, then $f(c)$ is a relative min.
