Conquering Calculus

Basic Expectations (first line of defense)
- Staying awake all the time while in Calculus class
- Talking to others only about Calculus while in Calculus class
- Listening to teachers/classmates talk about Calculus while in Calculus
- Using my phone only to work on Calculus while in Calculus class
- Working only on Calculus while in Calculus class (not work for other classes)
- Attempting all homework problems every night (not just copying down answers)
- Checking all homework problems every night
- Making sure my notation is 100% accurate when I do homework each night
- Making sure I put units 100% of the time (when applicable) when I do homework each night
- Putting homework questions on the board for us to go over as a class if you don’t understand them
- Completing at least 1 review (per test) given in class
- Correcting every missed problem on quizzes
- Correcting every missed problem on Tests

Additional Strategies (Next line of defense)
- Asking myself “What does this mean?” instead of just “How do I do this?”
- Helping those around me understand Calculus (teaching others is the best way to learn!)
- Asking questions (via Remind) about homework questions at night when you have them
- Asking classmates questions about homework
- Checking/correcting work in color so that you know which problems to go back to
- Reading through notes/homework on nights you don’t have specific assignments
- Completing suggested homework problems
- Completing reviews given in class
- Completing ALL reviews given in class
- Completing ALL reviews on Weebly
- Timing myself while I’m working on reviews so that I know if I can do questions quickly enough. Redoing reviews or trying other reviews until I can do problems quickly (2 minutes per MC, 15 minutes per Free Response)
- Watching videos
- Googling resources and/or online videos to help me with Calculus
- Attending SMART Lunch and working on Calculus during it
- Asking questions about Calculus while I’m in SMART Lunch
- Coming before school to ask questions about Calculus
- Attending Review sessions before tests.
